FYI. Reading Mark's note, it looks like they are in need of work. I think his ideas are correct, but just need to make sure command structure is aware.

Kelly,

This was done outside of Unified Command and his Branch Director. John is addressing it thru Warren Zanger

Thanks  
Anthony

Anthony/John,  
Could you please talk with Mark about this request. Also, any changes which involve RM data entry or pull need to go through Susan Jablonski first. Thanks.

<image002.png>

Hi Cari-Michel and Gary,

I would like to discuss (via conf call or any other convenient means) expanding our pool of water systems from which to select for site evals including the Beaumont region. We also need to discuss plans for the potential of setting up teams in the "Charlie"

branch (already forming but not infrastructure folks that I am aware of other than TCEQ Region staff) which would cover the Beaumont Region counties.

To do that, we need to assess the potential workload based on every one's expectations. We have 10 DW assessment teams now and have been scraping to get enough work for them. They have enough for today and some of those systems will bleed over into tomorrow, but we are having to look east now for more systems.

Our focus has been on the CWS and but have started to incorporate some of the NTNCs that are schools, daycares, health care, etc (NO industrial or private business sites were selected for today).

We also included systems meeting the above criteria that had NULL status codes indicating no attempts at phone or other contact has been attempted.

We also need to start planning for potential transfer of staff to Charlie Branch, projected timeline to completion based on our selection parameters, rotations (including transition cross-training), demob, etc.

Any guidance on how you want us to adjust our targeting procedures would be appreciated.

Thanks

**Mark McCasland**
